

IT AND CYBERSECURITY PARTNER FOR

# Law Firms

## AUTOPILOT

You focus on your clients & business while we plan, implement, and manage your IT & cybersecurity.

Autopilot includes:

### Strategic Vision

With 25+ years of IT experience in the legal field, we know how to craft a successful IT plan with your firm's future in mind.

### Proactive Support

Our Proactive team identifies potential red flags before they become a problem.

### Legal Helpdesk

We've supported over 100 firms. We know everything from practice management systems to courtroom technologies.

### Vendor Management

We can support case software, eDiscovery, document management, law accounting software, payment processing, and more.

### Compass Security Suite

This service enables legal practices to predict, detect, and respond to threats.

# 40%

### More Revenue

for firms that optimize their technologies. -

### Strategic Planning

We help you develop long-term IT plans that consider your firm's goals, budget, projections, and client and employee needs.

### White-Glove Service

We understand the demands of the legal industry. Our staff is ready and eager to help you and your employees. We have the people and resources to provide a responsive service.

### Reduce Risk

Protect your data and clients' private information. We'll help you minimize the chance of downtime, security breaches, and system failures.

### Accessibility

We keep an eye on all aspects of your IT environment. We'll ensure your technology can go the distance, no matter where you need to be.

### Process Driven

We continually work on refining our processes to deliver world class services and solutions to our clients. We don't stop at "good enough." We aim for extraordinary.

### More than IT

Our discussion doesn't stop at technology. We have insights to help firms tackle their most significant issues and move forward.

## PROTECT YOUR FIRM & CLIENTS

WITH BETTER IT SOLUTIONS
